

Electronics Production Specialist

XSENSOR Technology Corporation is a world leader in pressure imaging technology. We develop innovative products that are used to design and test of products in the Automotive, Medical and Mattress markets. Our systems are used by industry leaders around the world. For more information, please visit XSENSOR.com

We have an opportunity for an **Electronics Production Specialist** to join our team. In this role, you will be an integral part of the Manufacturing Support team.

Key Job Duties:

The main job function involves custom integration, assembly and functional testing of our proprietary electronics sensor pack units (wireless and wired), which are used for connecting sensors to computer equipment. This will also involve:

- Repair and troubleshooting of electronics (PCBAs, as required)
- Assembly and test of new products
- Scheduled maintenance, repair and troubleshooting of production test fixtures, equipment and computers
- Qualify and evaluate new computer and control hardware as required; perform full evaluation and system testing as required
- Support and setup of inventory computer devices (media players, panel pc's)
- Creating and updating work instructions (as required) for assembly, maintenance, repair and equipment setup
- IQC inspection and configuring of computer devices for our sensor systems

Work Experience and Skills

- Electronics assembly and troubleshooting
- Demonstrated superior technical skills, with excellent hands-on abilities
- Experience in a manufacturing/production environment

Education

- Technical diploma with specialization in electronics

Personal Characteristics

- Well organized with excellent attention to detail
